BRYSTON SP3 Customer Feedback

Hi Folks,

I've got to say that anyone who has got an SP3 or is going to be demoing one or trying a home demo, then you must watch Super 8, watched it last night and there are a couple of scenes that visually are pretty spectacular but on the audio side they are totally amazing.

I can honestly say, hand on heart, that I have never heard home cinema, or cinema for that matter, sound this good, talk about being pinned to the sofa, it really does show off the SP3 to the max and what an awesome performer it really is, I think I've found a new demo disc, plus it's a pretty good film also, but it looks like they've spent a lot of time getting the soundtrack spot on, highly recommended

I'm really back into my movies, thanks to the SP3, anyone got any other 'blow your socks off' soundtracks they can recommend
