Subject: SP3 Feedback

James,

I just wanted to thank you for the great follow-up and support that you've been able to give me since I received the SP3 a few months back.

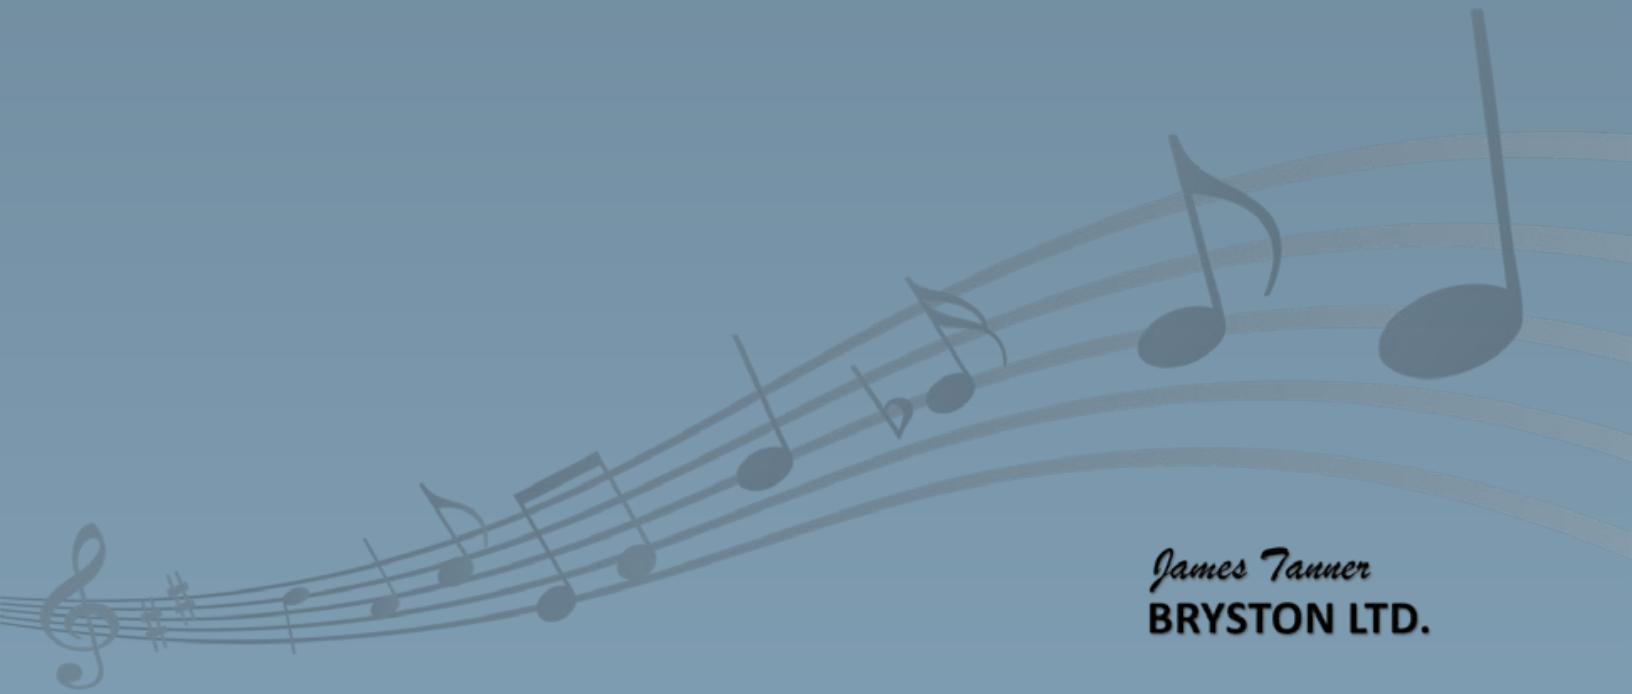

I recently had a Lord of the Rings marathon (watching all 3 extended edition movies back to back for 13 hours) and I couldn't believe the difference between the sound from the SP3 and the SP2 that it replaced. - **Simply amazing.** I had people over watching who were able to pick out specific sounds in the background information with a new clarity that had not been there before. They were very impressed.

In particular, the bass is much more clean and pronounced now that I've tweaked my system. Also, **the soundstage during 2-channel playback is amazing!** I am having a hard time pulling myself away to get work done around the house.

Thank you for producing such a great product and standing behind it with respect to firmware updates to continuously improve.

Thanks,

Michael
