

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

April 2012

SUBJECT: SP-3 Processor Feedback from One of Our Dealers in N.Y

From - AUDTEK SALES AND MARKETING

In a NYC Triplex, with dual level terraces, the dealer/integrator*1 used the advanced video pass through to seamlessly pass 1080p video to one DLP projector and 3D to another[DILA] projector.

As quoted by the salesman: "We were a little apprehensive of using the SP-3 in this installation due to the need for it to plug-n-play with the [Savant], without any tolerance for re-visit due to [OUR] mandatory requirement by the owners to be off site within 5 days. Using two SP-3's added to our concern as this was a new product for us."

This is the second major installation of the new BRYSTON SP-3 pre-processor in the NY Area recently and additionally utilized a new BRYSTON 8ch. D-65 Class D Zone amplifier. (http://www.bryston.com/products/power_amps/D65Z.html) "**The Bryston D-65 Zone amp worked brilliantly for us** as a surround amp in the bedroom where space and ventilation was limited". The dealer/integrator used the RS-232 control from the SP-3 to integrate with the SAVANT system, and both units handled all switching flawlessly.

“We have always respected the sound of BRYSTON, and I have sold BRYSTON throughout my career, but this SP-3 is on a whole new level... Might be the best sounding pre-amp I have ever heard at any price!

Thank you for suggesting this”.
