**Hi Folks**

**The BDP-1 is here and it's outstanding!**

The user control interface is great. It passed the gapless playback test. It sounds wonderful. I'm obeying the directive to not download the beta firmware until tomorrow, but that's only three hours away.

I've only had it in my system for a couple of hours, but I love it. Bryston nailed it!

If I were pressed to pick nits, it's a little slow to build up the database (as compared to the SONOS or the NA-7004), but I'm not complaining at all. I'm extremely pleased with this purchase.

My network audio player woes appear to be a thing of the past.
