

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston SP-3 Processor - UK Customer Feedback

DATE: August 2012

Hi James,

I've just spent the evening revisiting my record collection.

I hooked up my Gyro + TechnoArm + AT33PTG + PS Audio GCPH phono stage, and connected it to the SP3 using balanced cable to Bal2 input and 2 Ch ByPass.

A bloody amazing, shed loads of detail and dynamics and sound stage, but vanishingly low surface noise - how is this possible? This is the same rig I used with the SP1.7, and although it sounded good then it was nothing like as good as it is using the SP3.

The SP3 is one amazing bit of kit, a true all rounder, and delivers top results from all sources.

Only one problem now - I've got to buy more vinyl!

Regards
Richard
