A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston Model T Loudspeakers Feedback

DATE: September 2012

Hi Folks – David is a professional sound engineer who has won many awards for his work in Movies and TV sound.

“Hi James,

Thanks again for making the time this afternoon for a first listening session with Bryston's new passive and active T1 speaker systems. Comparing the subtle differences between the two setups was a lot of fun and I love the flexibility you've built in for your customers. We've had many conversations about the relative merits of active vs passive speaker designs, and with a few simple choices you've managed to address them all.

From a performance point of view, both systems are top notch. I've always loved the sound of your listening rooms, **and these new combinations are as good as I've heard!** While I loved both systems and don't think they differ too much, the active system with the three Bryston power amps truly was one of the best sounding Hi-Fi systems I've had the pleasure to hear.

I'm looking forward to more time with them at TAVES and perhaps down the road if you are able to send a review sample our way at The Inner Ear. I'd also love to try the smaller pair at the studio in my new sound design suite.

Thanks again and well done.”
