Bryston Model T update

I really must comment further on the Bryston Model T's

We have all seen the positive reviews these speakers have been getting; in fact it's so much, you may start taking it with a grain of salt.

Let me tell you, I have been playing mine since early this morning. First, I have done no speaker setup whatsoever I just flanked my JBL's with them. Second I still haven't put the Outrigger stands on them, which will further improve their sound even more.

Guys, I kid you not; these speakers "Must be Heard" to be believed. They just do everything right, the bottom end is crazy deep. The mids, and highs are terrific; but even more amazing is the sound stage these are throwing.

Now I know I'm driving these with all Accuphase gear, but these are simply amazing. I can easily put these up against speakers costing \$15-\$20k. Another fantastic plus is they have a remarkable small footprint, and are very WAF friendly. What are you waiting for; get out and audition a pair!

James... Truly Outstanding Work!
