Hi James,

Report from the front:

The Bryston speakers have been very well received by all who hear and see them.

I had two serious audiophiles in our Bryston demo room last Saturday. Both were blown away by the Model T's expansive sound stage and amazing imaging. They kept tapping their toes and saying things like "Wow!" and "Great detail!". One of them is considering replacing his current 25K speakers with the Model T. They brought CDs to listen to but never got to them because they were having so much fun playing HD Tracks on the BDP-2.

They also commented on the impressive build quality and relatively small footprint for a reference caliber speaker. They have requested to come back when the Model T TOW comes in to experience a movie on a complete Bryston HT system!

I thoroughly enjoy demonstrating and selling Bryston products.

Keep up the good work!
