SUBJECT: Bryston Model T Speaker - Customer Review

## Bryston Model T Speakers with Bryston 14B SST2 Amplifier

Hi James,

I wanted to have a pair of Model T speakers since I listen to them at the Montreal Audio show this year, was very impressed by them.

Listen to them later at my dealer in a room similar size as mine. Replaced my one year old speakers (worth \$10,000) with the Model T's, have been listening to them for not much more than about two to three hours now and can attest everything that have been said about them to be true. I really like the external crossover also, it gave them a very special looks.

I really enjoy the power of the 14B and find it to be a very musical amp. It replaces my 4B ST which sometimes get the clipping light on but with the 14B have not clipped it yet. Very satisfied with the upgrade. The 14B is now powering a pair of Model T Signature just received a few days ago and just have the chance to listen to them briefly and so far this is the best sound that I have in my listening room, will probably be my last pair of speakers (in fact this is my 7th pair since 2000 (\$3000 to 10000) always driven with Bryston electronics) These speakers are very warm, dynamics and play beautifully when pushed loud, in fact it is a real pleasure listening to them at 12 even 1 o'clock position on my preamp (BP26). Really enjoy them so far.

Thank you James for a wonderful pair of speakers.

Gil
