Sent: Thursday, October 03, 2013 10:17 AM

“James

The Model T’s are just fantastic!

The sense of realism and presence they convey is uncanny. Kudos to you and your design team for building such a great speaker.

My wife (a pianist and professional French horn player) was equally impressed, and she’s quite discriminating in her musical tastes. “They’re so full and rich”, she said several times (and she should know full and rich having been a member of several orchestras across Canada). I’m impressed with the way they resolve cymbals – it really sounds like a wooden stick hitting a tempered metal disc. The “bite” of the reed on saxophones, and the initial pluck of guitar strings (both electric and acoustic) is also incredibly life-like. On drums, I get a real sense of a taught membrane being struck; the tone of the drumhead really comes through.

I haven’t given them a true run-through with piano, but so far they’re very faithful to the instrument (we have a baby grand, so I know what they sound like). I’ll let you know more of my impressions after further listening.

Once again, thanks for the awesome (there’s that word again) product”
