BRYSTON MINI T LOUDSPEAKERS

Hi Folks

Musical jewels!

That was my impression after an active listening of this Mini T model. **Wow. It was magical.** I've passed a wonderful 3 hours (I will have to return as it wasn't enough long) with Rick Bastedo, sale agent, Hi-Fi Specialist of Cox's Audio in Fredericton (New Brunswick).

I'm in process to buy a complete new sound system. Start from the beginning as I just have right now my Apple (computer with iTunes Library) and the Sonos Play 5 (bought there, at Cox's last year). Everything we have listened yesterday night was Bryston (including the DAC and the converter) except the CD Player. I had a bias perception against Bryston amplifier and other of your products. Don't know why exactly, perhaps some Magazines Critics in the past. Who knows?

But this listening session yesterday with some of my favourites CD and records was astonishing. Unfortunately, I don't have the budget right now to buy the Mini-T, your integrated amplifier and the converter and the DAC. So I will have to choose.

Again, bravo for this accomplishment. You have a pretty good salepersonne with Rick Bastedo, of Cox's Radio. He knows your product very well. **I'm still flabbergasted by the superiority of your DAC and Converter compare to a listening with a CD. Wow. Marvellous.** Indeed, Canada is going to become an audiophile and Hi-Fi product reference - A world leader in this sector Why not? Again, bravo for this so good Mini T Bookshelf speakers. Their bigger brother should be a jaw dropping experience when you listen to it.

Keep the good work!

Benoît A. Lanteigne
