Subject: Speakers: Mini Ts

In January I had the good fortune (as it turned out) to be encouraged to audition a pair of Mini T speakers.

I admit that beforehand I was a bit skeptical as I'd always known Briston primarily for its power amplification expertise. Long story short is that once I heard the Mini Ts there was no turning back.

A few days ago I bought a pair of the Briston speakers and they have changed the way I hear music. Since buying the Mini Ts I've had a bit of time to listen to them and everything I remember from my January audition has come back in all of its textured and rich sonic detail.

Simply put, these speakers make music soar. The sound-stage they present the listener is deep, wide and perfectly balanced. The speakers give an amazing sense of presence to the music (as in you are there live). One of the most enjoyable things the Mini Ts have done is breathed new life into my

favorite recordings by presenting the music fully and as it was recorded with all of its nuance, power and dynamics.

I am very glad I auditioned the Mini Ts, and I am extremely glad I now own a pair.

Sincerely,
Charles Morrissey
