A Lifetime of Music

**MEMO: To All Bryston Customers**

**SUBJECT: Bryston Mini T Speaker – Customer Feedback**

August 2014

**Hi James – From Singapore**

Ivy your dealer in Singapore was kind enough to lend me a pair of Bryston Mini T's while my (EDIT) are being repaired...totally forgot I need speaker cables as they are passive. I will get some on Monday...anyway. Pat is very impressed regarding the looks...she fell

in love immediately even without hearing them..so great "wife factor" !

I just got the cables and set them up...superb sir...same tonal balance and natural sound character as the big T's! And the bass is exactly what I was missing before...played some high quality vinyl...and the detail and pace is beautiful....now we must choose the amp...and try to find a buyer for the (EDIT).

Ivy gave me the lovely 4B for loan.....it has indeed good power and its not too much power for the Mini Ts.

James I feel the Bryston Mini T's provide a very natural and seamless soundstage also...I think a 2- way just can't match that, no matter how expensive... Plus It's nice and slim...which an active speaker can't match usually...I honestly had the (EDIT) speakers under consideration as well...but not anymore. I blasted a few live concert bluerays...and the soundstage is amazing..most of all, no compression even at "life" levels. and the bass has real punch..eg the basedrum kick.. .which is so crucial to us drummer boys! Also most of all, I am surprised at the resolution of the top end too...I don't miss anything even compared to my active speakers!

To summarize, I would say the Bryston Mini Ts sound like a "big speaker"...and have exactly the same attributes of the model T's - natural and seamless soundstage..and accuracy across all listening levels...it even sounds right while listening from outside the room..which is always my personal "test" !

**Congrats to you James!**

**Tom Forester- Singapore**
