Been a while since I posted here but just thought I'd share my experience, as I was able to go to the 2015 CES this year.

A real shocker (closer to the realm of reality as far as price goes) was the Bryston Mini-T speaker.

These speakers are stand mount, IIRC they're 22" tall. The sound radiating from these was absolutely stunning and very full range for a more a more compact loudspeaker, I believe they're about \$3200 the pair.
