

# BRYSTON

A Lifetime of Music

**MEMO: To All Bryston Customers**

**SUBJECT: Audiophile Disease**

## Middle T Speakers

Hello, James.

I'm thrilled with my Middle T's and Bryston B100 amplifier. The worst part about them is that they unleashed a serious case of the "audiophile disease" in me. Slowly falling deeper into debt with each upgrade that brings me closer to nirvana. Now they've just increased my line of credit by 15k and the first thing that comes to mind is a 4B and a pair of Model T's!

I now have my Middle T's about a third (5') of the way into the space of my opened concept house. Seems to be the best sound (at least to my ear) yet. The sound stage stretches well beyond the speakers, seemingly higher than the ceiling and the depth ranging from beyond the back wall to the front of the speakers.

The clarity and space between instruments is also quite amazing. I upgraded cables not to long ago and that helps to extract even more detail out of my favorite recordings. I can now hear the static of each recording room rather than indistinguishable added noise.

All in all, purchasing the B100 and Middle T's at what seems like a lifetime ago, has made a massive improvement to my life and I'm very grateful that I decided to buy them.

That's how I feel about them, in a nutshell.

Thanks,  
Dane
