A Lifetime of Music

MEMO: To All Bryston Customers SUBJECT: Bryston Mini T – Customer Feedback

July 2015

Hello Mr. Tanner,

We had an e-mail exchange back in December 2014 regarding Bryston Mini-T loudspeakers during which you answered various questions.

Just following up to let you know that I recently purchased a pair of Mini-Ts from Audio Eden in Aurora, Ontario and am really pleased. These speakers satisfy that "Goldlocks" need in my somewhat smaller living room. They're not too small and they're not too big, but just right. In my room they have the immediacy that a standmount (bookshelf) speaker possesses but also have the deeper bass and impact that previous floorstanders have provided. They also sound great (coherent) at somewhat closer listening distances.

Excellent speakers! Thank you for taking your own "hobby" loudspeaker project and refining it to be a commercial product line.

FOLLOW UP:

Hi Mr. Tanner,

Yes the Mini-Ts are special.

For years (late 80s onward) I owned Canadian made Energy Reference 22 loudspeakers and have spent the last 5 years trying to find a replacement for them. Tried a variety of excellent speakers including KEFs and Revels but nothing worked better in my room than my old Energy Ref 22s until discovering your Mini-Ts.

Similar sized speaker but the Mini-Ts are superior to the Ref 22s. More accurate and even more powerful. Thanks again for finally ending my loudspeaker search. It's nice to know that Canadians make some outstanding hi-fi gear that competes with anyone on the world stage.

Ron
