MEMO: To All Bryston Customers

SUBJECT: Bryston Mini T Speaker –Customer Feedback

September, 2015

Hi James

I purchased a pair of Bryston Mini T speakers ... they are just spectacular!

I got them at Audio Video therapy in Nashua, NH.

I had a vintage pair of Yamaha NS 1000's that were still really awesome speakers but the newer technology is so much better.

I just about purchased the Middle T's but couldn't work a tower into my Living Room and Entertainment center. I actually have them in open cabinet bays and it doesn't seem to affect the quality of the sound as I have a pretty bright room.

These speakers are really clear and clean sounding with great bass. It sounds like a live performance. On vocals, they are amazing and the imaging is better than any of the other speakers I listened to including B&W. I don't blast them as my room will create some sound distortion if

too loud but they can rock with really sharp bass if driven. I just prefer the sound at the point where it has volume but is not rattling the walls. This is where these speakers are the best say with Diana Krall.

Like every speaker, the better the input, the better they sound so HD audio is over the top.

Thanks again
Tom Bacon
