

# BRYSTON

A Lifetime of Music

**MEMO: To All Bryston Customers**

**SUBJECT: Dealer Feedback on Bryston TAVES Demo**

## Virtual Theater Solutions

To: James Tanner and Associates of Bryston Ltd.

My wife Renee and I very much enjoyed meeting and speaking with you, Brian and Steve at the 2015 TAVES Consumer Electronics Show. Our trip was well worth the time and effort and we were rewarded with your kindness and consideration. Thank you so much.

My company, Virtual Theater Solutions, has been using Bryston electronics: amplifiers, pre-amps, DAC's since 2007 and we have been entirely satisfied with all

aspects of the products. Performance, build quality, visual presence, warranty coverage, and all other important qualities of these products has been exceptional.

As I explained at the show, I live and have a custom installation business located in the Central Ohio area and for several logistical reasons I had not been able to personally hear any of the new Bryston speaker products. After examining all of the specifications, downloading the manuals and looking at the pictures in the brochures and scouring the internet for information, I was convinced that these products were more than worthy of praise that I had read from reviewers and audiophiles who have written about the Bryston speakers.

But I had not heard them myself, in person. I was becoming more and more frustrated when I contacted you via an audio forum and you told me that Bryston was exhibiting at the 2015 TAVES Show.

As we entered the room my wife walked straight to the Model T's and admired their beauty. She and I were immediately impressed with their classic and clean design and how they would fit in and complement any decor. After looking over the full line of Bryston speakers on display we sat with you in the listening area and were totally fascinated with the complete and immersive sound stage in front of us.

The Model T's formed a wide, deep, tall and full sound field that was essentially three dimensional. The music filled the large room from floor to ceiling and well beyond the speaker boundaries through the back wall with tight, deep, powerful bass; delicate, detailed, crisp highs with articulate and sometimes forceful mid-range vocals and instruments. I thought that the balance between these qualities was astounding.

I would encourage anyone who has heard about the Bryston Model T's but has not actually listened the speakers to make every effort to do so. You will come away impressed and convinced the Brystons deserve the rave reviews and favorable comments from audio professionals and fans.

I have contacted Gary Dayton and hope to soon have the privilege of offering the Bryston speaker line to my customers.

Sincere Thanks,  
Mark Barbour
