

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston Model T Speaker – Dealer Feedback

Subject: Unboxed Bryston Model T Speakers

James,

“My customer dropped by and allowed us to unpack his new Bryston Model T speakers.

What a smile on his face when we hooked them up. He left with an unforgettable grin, excited to know they will sound even better when the 28B Cubes arrive. He left yesterday with the look that says he found what he is looking for (I feel proud that I really made a customer that happy). Having lived much of his music enjoying life listening to (EDIT) speakers, he now has the means to have audiophile sound and has discovered he can still have emotion fueling volume.

I do not recall having this much fun listening to a speaker since the (EDIT) over 20 years ago. WOW! WOW! WOW! Incredible bass, open airy mids and highs and remaining uncongested into louder than usual volumes. It's delicate but powerful.

I am sitting typing this 60 feet away from the Model T's that are sitting in a different room and they continue to impress (no, amaze me) They take me to the concert like no other speaker I can remember. Thank you for

making me and my staff get excited about our music again. ALL the staff brought their favorite cd's to work this morning.

FOLLOW UP:

My God have you made a memorable product, at the end of the day yesterday after a long, stressful week we hung around the store for 2 hours listening to your Model T speakers. The interesting thing is that we can't quite put our finger on exactly why we absolutely love these speakers. It's the highs, they're extended but not screechy. No, it's the mids, vocals and instruments big and spacious, never sounding congested even when we're irresponsible with the volume. No, it's that insane bass, when have we heard the sound of amazing bass that would impress with speed metal and rap. We have zero hours in adjusting them yet and they sound incredible.

Good job sneaking up on us with your product, have a great rest of your weekend.”

Sincerely,
Brad Ferguson, Audio Concepts, California
