## **Re: Bryston Turntable**

**“Hey folks:**

**Just reporting on my new Bryston Turntable.**

**In terms of the table's general performance: I have been audiophile for 40+ years; would not say that I have the most discriminating ears by any means but I have heard many systems and a boatload of analog in my time.**

**My ears do seem to be very sensitive to tiny speed variations, maybe more so than most. In that regard in particular the Bryston seems to me to be absolutely dead-on, perhaps more than any other table I have heard.”**
