

# BRYSTON

A Lifetime of Music

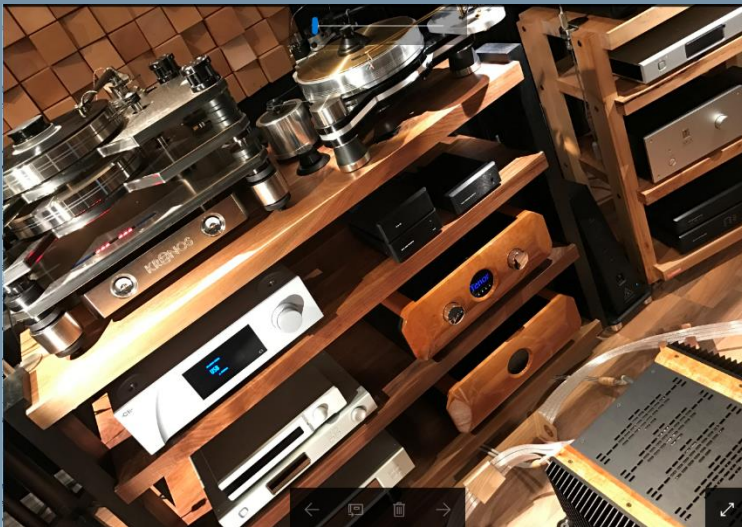

**MEMO: To All Bryston Customers**

**SUBJECT: Bryston Phono Stages**

January 2017

Hi James,

I think I already did, but did I tell you how stupid good the new 3 piece Bryston phono-stage is?

I'm using the TF-2(30db)/BP2-MM/PS-3 at an MSRP of 3.3K CDN between an Ortofon A65 Kronos Pro turntable, Kronos Black Beauty Tonearm, SPSC Power supply MSRP 66K USD and the Tenor Line1/Power1 pre-amp MSRP \$115K CDN.

Price-wise the Bryston is completely outclassed, making up less than 2% of the total cost of the turntable/phonostage/pre-amp and WOW, I'm just stunned.

It's so natural yet detailed. Has tons of gain and energy yet extremely quiet. This is such a fantastic phono pre-amp regardless of price. At only \$3300 and \$2750 for the BP-2 MM/MC with PS-3 (which is the way I would go if I wasn't a retailer needing a transformer (TF-2) to demo on it's own) it's a killer bargain.

Another job well done by the Bryston team, congrats.

Cheers,

Mark.
