

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston A2 Speaker – Customer Feedback

March 2018

Hello James,

Sorry, my English is not good.

Maybe I will not be able to correctly describe the differences between the previous speakers I have owned and the Bryston A2.

I've bought one pair of your Bryston A2 speakers.

I have owned the Audio Physic speakers - Tempo6, Classic 10, Sitara and more. Audio Physic excels in displaying 3D space and the most delicate detail, but not in such a sweet spot as the Bryston A2. Especially the upper tweeter

frequencies which are exceptionally clear and focus without any sense of sibilance.

First I have to say that in fact the A2 speaker is much more beautiful than the pictures I have seen.

It's a great sound!

What I most appreciate about the A2's is the dynamics, the sweet spot and the ability to play any music (rock, pop, classic).

They practically have unlimited performance without compression.

I am very happy with my A2, AC1 Mini and A Mini in my surround setup. I also bought a second-hand SP2 AV processor. Thank you for working on these great products.

I hope we will spend a long time with BRYSTON speakers and I will buy other components in the near future (speaker cables SC4, power amps, outriggers for my A2's.
