MEMO: To All Bryston Customers

SUBJECT: Bryston SP-4 Processor – Customer Feedback

Hi Folks,

Starting to get some feedback on the new Bryston SP-4 Processor

Hi James,

Hope you had a great 4th of July!

Thought I would share with you my thoughts on the new Bryston SP4 Processor.

My early impression of the Bryston SP4 is that it's awesome!

I love the design as it looks extremely sleek, very minimalistic in a great way, and looks killer in my rack. The endless ability to basically route your outputs anywhere is extremely impressive and easy to do. I'm getting the hang of the software and it's quite fun to play with. I wish I was a bit more tech savvy because I want to use it to its full potential.

Like I mentioned above I am beyond happy with the purchase. I love the unit and I know it's going to be at the head of my system for a long time to come. I am eventually going to hook it up to my control4 system.

This Bryston SP-4 Processor blows my McIntosh out of the water.

In closing I want to say thank you for making such an amazing unit. I am really happy with my purchase and I hope this email was even just a little helpful.
