MEMO: To All Bryston Customers

SUBJECT: BDP-3 Additions – WiFi & Internal Drive Option

September, 2017

Hi Folks

I am please to announce that there are too optional additions available for anyone ordering a 'new' Bryston BDP-3 Digital Player.

The additional options:

1. Internal WiFi:

The WiFi is capable of up to 300Mbps 802.11n and will work with 802.11a/b/g/n wireless capable networks. Most if not all 802.11ac networks should be backwards compatible with one if not all of these versions.

2. Internal Drive:

A 500 GB quality mSATA Solid State drive or 2TB SATA rotary hard drive.

The advantage of an internal SATA drive is it bypasses the typical SATA to USB conversion.

Please contact Bryston regarding pricing.
