

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers
SUBJECT: CEDIA 2017 – BDP-3 and ROON

September, 2017

Hi Folks,

For those using ROON with their Bryston BDP Digital players we will be showing how the BDP will integrate with such products as Crestron, Control 4 and Remote Technologies Incorporated.

Come say hello at Booth 5803 if you are attending CEDIA 2017.

For those who need integrated control over each zone and can take advantage of ROON's new partnerships with control companies to install Bryston BDPs in some of those zones. Utilizing the Bryston BDP-3 Digital Player provides bit perfect high resolution sound in key zones while still providing for the use of less than ultimate quality audio elsewhere in the house.

Roan leverages their unique software and our Bryston world class hardware (BDP's) to enable whole home audio from a single library with multiple streams in multiple zones using a wide variety of hardware ranging from inexpensive typical systems for non sound quality critical rooms to world class audio oasis built with Bryston.
