Stevie Wonder Chooses Bryston **P.1**

Remote Possibilities **P.1**

Film Audio Produced On Bryston **P.2**

### Remote Possibilities

The following two products have been tested and are known to work effectively as learning remotes with Bryston infra-red remote controlled units. Both are available over the Web at "XIO.com" which is based in the USA but has distributors all over the world who carry versions of these products that are compatible with local regulations and power grids.

**UR24A** This remote can be programmed via three digit codes to emulate hundreds of different remotes and it can "learn" or capture the IR transmissions of most other remotes.

**Radio Shack #15-1924** This unit is almost identical to the one above.

**Remote control extender: PM5900** (Sometimes sold as two separate units)  
**ST539** IR to RF transceiver  
**RE549** RF to IR transceiver  
 As these units plug in to the wall power outlets they must be acquired for the particular region in which they are to be operated.

## Stevie Wonder Chooses Bryston

We are pleased to announce that Stevie Wonder has chosen Bryston amplifiers and PMC loudspeakers for his private recording studio in Los Angeles. Wonderland Studios is where Stevie writes and produces all his music. Stevie purchased a pair of PMC BB-5 loudspeakers and two 7B-ST Bryston amplifiers to power them. He also purchased a pair of PMC TB-1S speakers with Bryston PowerPac 120's attached for his small writing and composing room.

Steve is going to use the new system to monitor his new up-coming record and he also plans to add a center channel, subwoofer and surround channels for monitoring the re-mixing of his previous catalogue in a full 5.1 format.

After auditioning the system for a few days Stevie's comment was "I have never heard a monitoring system that makes my voice sound like the way it sounds to me in my head, this one does."

It is very satisfying to have a person of Stevie's stature in the music business appreciate the qualities of our Bryston/PMC monitoring system.
