Bryston Scores Hat Trick!

Bryston is pleased to announce that for three years running Bryston has won the:

Certificate of Excellence from "Inside Track" for:

- 1) Product Quality and Reliability
- 2) Prompt Resolution of Service/Return Repair Issues.

Dealers from 41 States plus Canada are asked to fill out a questionnaire grading their suppliers in a number of "Supplier Loyalty Test" categories.

It is very gratifying to know that our efforts to support our dealers and our customers are duly recognized.

To attain Top spot for 3 years consecutively is certainly rewarding indeed.

SONY Mastering Installs 5.1 Surround

SONY has recently installed a PMC/Bryston 5.1 surround system at their mastering facility in New York City.

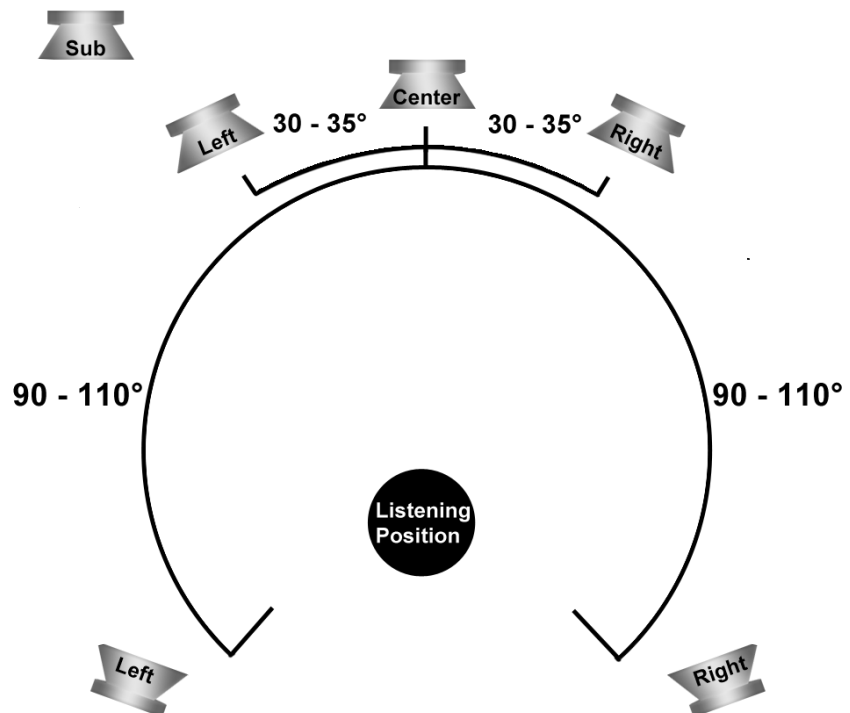

The 5.1 monitoring system consists of three PMC BB5/XBD Active loudspeakers for the Left, Center and Right front channels and a pair of MBI's for the rear left and right channels.

Amplification consists of 8 PMC Series 7B's, 3 PMC Series 4B's and 3 PMC Custom electronic crossovers. The first project to be mastered by Viado Meller on this new 5.1 surround system is the most recent Celine Dion album due to be released in the next short while.

The album is encoded only with 5.1 and I am sure there will be many more releases to follow in due course.

We are very pleased with the continuing success and recognition our PMC/Bryston systems are gaining the world over. There is a very good chance that the movie you watch or the music you listen to was produced on a PMC/Bryston monitoring system.

To have a world class facility like SONY mastering appreciate the merits of our PMC/Bryston monitoring systems is a great honour indeed.

Bryston/PMC User List

Abbey Road Studios	Capsiso	Hillside Studios	tories
Advantage Audio	Castle Sound	Imagica	NATS
Anne & Roger Dudley	Chesky Records	Imagica	Nautilus
