

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston A1 Mini Speaker - First German Review

June 2015

Hi Folks,

Please see the attached review from one of Germanys top audiophile magazines (Fidelity) on the Bryston Mini A speaker.

Thanks to Alex ... one of our German customers some highlight English translation.

Hi James - They say that these speakers are truly awesome!

Given its size they have a great dispersion. So where ever the listener is located in the room the sound is always just 'there'. An outstanding three - dimensionality and space around each song no matter what genre is playing. and for those who always have trouble to get the sweet spot right...no problem for the Bryston speakers.

They find that it is not always necessary to place them on speaker stands - a place in a shelf can do the trick as well. If someone wants more bass then a additional sub could help here but they feel that the bass of the Mini A's is a class of its own.

Alex
