

INTRODUCING SST² SQUARED AMPLIFIERS

01.09

Based on our research in designing the new Bryston 28B-SST Mono power amplifier we have decided to include these performance advancements in a new series of Bryston amplifiers.

All our newer designed power amplifiers will now be designated the **Bryston SST² (squared)** series.

This applies to all versions of our amplifiers and the front panel power switches as well as the serial numbers will have the squared (²) symbol as part of the model/serial number.

ADVANCEMENTS

Depending on the specific amplifier model advancements include:

- + New power supply transformer design
- + New push on/of power switch
- + New chassis design
- + New Soft-Start Circuit
- + New Balanced input stage
- + New Power Supply board
- + Bridging mode performance improvement
- + Reduced point to point wiring
- + Reduced circuit board count
- + Redesigned output chokes

These new Bryston SST² amplifiers are currently in production and available as of January 2009.
