

MEMO: To all Bryston Customers
SUBJECT: What H-Fi Magazine Five Stars *** and Reference System**

August 2009

Bryston is very please to announce that the Bryston BP26 Preamplifier and our new 4B SST-2 amplifier have received the top '**5-STAR**' rating in the August 2009 issue of Britain's very prestigious audio magazine What HI-FI! In fact, they have positioned both the Bryston BP26/MPS-2 and 4B SST-2 as part of the magazine's '**REFERENCE**' system.

BP26/MPS-2 Preamplifier

4B SST-2 Power Amp

A couple of comments from the review:

BRYSTON DUO TELLS IT LIKE IT IS

1. There's little glamorous about this pre/power amplifier combination from Bryston, but it's as honest and hard-working as the day is long. **This is utterly truthful hi-fi.**
2. This Bryston combo should keep working for years. It's not fussy about music and is utterly truthful about the kit it's connected to. **These qualities have earned it a place in our reference system; we can't give a higher endorsement.**
