

**MEMO - Bryston Customer Feedback**  
**SUBJECT – TWO 4B SST's**

**WOW!....IMPRESSIVE.**

Hi guys,

A while back I was inundating you guys with questions regarding my 4BSST purchase and install options.

Well this is just a note to say "THANK YOU" for your responses. I must say I was shocked to get replies from the CEO. Nice to see a company where even management cares enough about its customers (or should I say potential customer since I hadn't even bought anything at that time).

Anyway I now have my two - 4Bs powering my Definitive Technology BP30's and CLR 2000 (bridged) and I am truly impressed with the sound. I had a couple of my friends over and we listened to the Eagles Farewell I tour on DTS DVD and these were some of the comments the next day in emails... not edited :)

- **"Crystal clear and effortless the whole time"**
- **"5 stars"**
- **"3 thumbs up (and don't ask whats the 3rd thumb :)"**

We did have it up pretty close to DTS levels and it was just great... sounded like the last time I heard them at the ACC.

I know you will get a few more customers just after that demo. Keep up the good work.

Regards  
Kurt
