

BRYSTON

INTRODUCING THE BRYSTON CUBED 2.0

Refined Cosmetics, Cooler Performance, Built to Last

- Refreshed with modern cosmetics that honor Bryston's legacy while elevating its visual appeal.
- A refined chassis with cleaner lines, precision-machined aluminum, and a removable faceplate delivers a more premium, customizable design.
- A unified 18-inch faceplate creates a cleaner, more consistent look across Bryston Cubed 2.0 and Class D systems.
- Optimized heatsink geometry and improved thermal pathways provide cooler, more stable performance during extended listening.
- Reduced internal cabling and precision stainless steel hardware support cleaner construction, easier service, and long-term durability.
- Enhanced reliability is backed by a 10-year limited transferable warranty.

Together, these refinements elevate Bryston Cubed 2.0 with a more sophisticated presence, quieter confidence under demanding performance, and the enduring reliability expected from a premium Bryston amplifier.
