

BRYSTON

IT DOESN'T GET ANYMORE 'CANADIAN' THAN THIS !

Bryston and Axiom remain firmly committed to their Canadian identity by manufacturing the greatest possible proportion of components at our facility in Dwight, Ontario, thereby supporting local craftsmanship, rigorous quality control, and the continued advancement of Canadian-made excellence.

We have made significant investments in our on-site factory equipment to maintain Canadian independence across all the products we manufacture.

Bryston manufactures many of its products' components in-house rather than simply assembling them

- Hand-crafted Speaker Enclosures, built in-house.
- Complete in-house 'Speaker Driver' manufacturing for consistent performance.
- Complete in-house 'Crossovers' manufactured for seamless integration.
- Laminator machine for speaker finishes produced with care and precision.
- In-House plastic Injection molding.
- In-House insertion machines for populating all circuit boards.
- All 'Metal Chassis' and 'Faceplates' fabricated from base sheet metal.
- Wiring harnesses manufactured in-house for dependable connectivity.
- Protective packaging Foam Cutting made to safeguard every product.
- An in-house large Anechoic Chamber supporting precise acoustic testing.
- All finishes applied in-house on all products by highly skilled staff.
- Canadian craftsmanship that supports skilled local jobs.
